

DOCUBAHN

Digital rights management (DRM) is a systematic approach to copyright protection for **digital** media. The purpose of **DRM** is to prevent unauthorized redistribution of **digital** media and restrict the ways consumers can copy content .In Banking Industry this can play very vital role as the distribution of digital media will be totally controlled by DRM Policies Print,View,Save Protection. The electronic document will be protected by hybrid encryption which can be accessed using only User ID provided .The User can view only the document assigned to him only with DRM Policies applied on it. In case the document gets leaked in any way it can be tracked since the document will be dynamically watermarked with(IP, Date , Time, UserID).This Software is completely web based application which provides complete reliability for Secure Distribution. The Viewer for the document is web based and the document can be opened on IE, Mozilla, Opera with DRM policies applied on them.

The electronic document will be protected by hybrid encryption which can be accessed using only User ID provided. The User can view only the document assigned to him only with DRM Policies applied on it. In case the document gets leaked in any way it can be tracked since the document will be dynamically watermarked with(IP, Date , Time, UserID).
